

# XELION

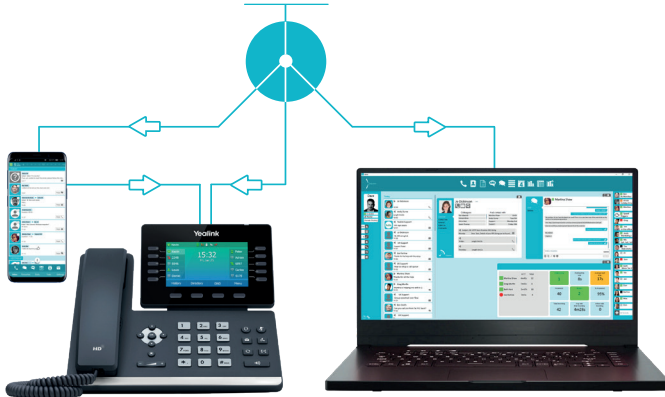

## PHONELINE SETTINGS

### WHAT

Your personal phonenumber controls where and how calls route when a colleague or external party calls your extension or direct number.

Your calls can route to the devices or apps of your choice with overflow and voicemail options incorporated as standard.

You are always in control!

### HOW

Xelion gives each user the ability to manage their own phonenumber through a single interface on the desktop and mobile apps.

Update your status, listen to voice mails, change your greeting, redirect your phone calls through the phonenumber settings in your softphone.

**Status**

- Telephones
- Softphone
- Mobile App
- Cisco Deskphone
- Redirect Line

Missed

- +441332043555 < Customer A Tuesday
- +441332043555 < Customer B Tuesday
- +441332043555 < Customer C Monday
- +441332043555 < Customer D Monday

### WHY

Ever found yourself leaving the office and forgetting to log out of a phone, hunt group or change your status or a call forward? With Xelion we have given each user the power to manage their status whilst on the move.

You no longer need to rely on your IT department or telecoms supplier to change your personal phonenumber or settings. We make working easy so you don't have to worry about unnecessary disruption.
