# XELION

MICROSOFT INTEGRATION

Xelion provides a free of charge Microsoft 365 and Teams integrator for all users as standard, giving users the ability to choose which elements to integrate depending on their needs.

AZURE AD

Azure AD integration enables many features with Xelion including auto-provisioning new staff members and single-sign-on, allowing staff to login to Xelion using their MS 365 logins.

Microsoft 365 and Microsoft Teams are registered trademarks of the Microsoft Corporation.

Microsoft 365

CALENDARS

The Calendar sync pulls your outlook schedule to your Xelion account for real-time changes to your Xelion status based on your meetings and outlook activity.

CONTACTS

The Contact sync automatically adds any Outlook address book contacts straight in to the Xelion address book to make it easy to search and call contacts.

TEAMS INTEGRATOR

Xelion's Teams integrator seamlessly connects your Teams desktop app to the Xelion platform. Teams users do not need any additional Xelion or Microsoft licences to enable this integrator. Our Teams plugin gives each user access to the full Xelion address book, a dial pad within Teams and click to dial.

TEAMS DIRECT ROUTING

If a user wants to make standalone telephone calls within Teams they will need Direct Routing. Xelion Direct Routing fully integrates the Teams desktop app with Xelion. Xelion Direct Routing includes all the standard Xelion features. Please note an additional charge is applied for Direct Routing.
